Q2

(c)

XML file - Student.xml.

```
<?xml version="1.0" encoding="utf-8"?>
```

```
<Student>
```

```
  <TreeViewItem Text="Student"/>
```

```
    <TreeViewItem Text="Sohan"/>
```

```
    <TreeViewItem Text="Mohn"/>
```

```
  </TreeViewItem>
```

```
  <TreeViewItem Text="Student Marks"/>
```

```
    <TreeViewItem Text="100"/>
```

```
    <TreeViewItem Text="90"/>
```

```
  </TreeViewItem>
```

```
  <TreeViewItem Text="Student address"/>
```

```
    <TreeViewItem Text="Madhavi"/>
```

```
    <TreeViewItem Text="Anand"/>
```

```
  </TreeViewItem>
```

```
</Student>
```

(2) WebForm.aspx

```
<html xmlns="https:">
```

```
<head runat="server">
```

```
</head>
```

```
<body>
```

```
  <form id="form1" runat="server">
```

```
    <div>
```

```
      <asp:TreeView ID="TreeView1" DataSourceID="XmlDataSource1" runat="server">
```

```
        <XmlDataSource1 runat="server">
```

</form>
</body>
</html>
```

Q2

(b)

Session

- A session creates a file in a temporary directory on the server where registered session variable & their value are stored.
- A session ends when user closes the browser or after leaving the site.

Cookie

- Cookies are text files stored on the client side & they are kept for the tracking purpose.
- The browser stores this information on a local machine for future use.
- When next time browser sends any request to web server then it sends those cookie information.

Name of the Subject: WT Subject Code: IT-749

Seat No: IT076 Student ID: 18ITVBW116 Branch/Sem: IT-VII

- It can be done with Wizard.

Name of the Subject: WT Subject Code: IT 719

Seat No: IT076 Student ID: 18ITUBN116 Branch/Sem: IT-VII

Q3 (a) WAP Using Wizard:-

```
<html>
<head runat="Server">
</head>
<body>
  <form id="form1" runat="Server">
    <div>
      <asp:Wizard ID="Wizard1" runat="Server"
        Active Step Index="0" OnFinish Button Click
          = "Wizard1_Finish"
        OnNext Button Click = "Wizard1_Next" >
        <WizardSteps>
          <asp:WizardStep ID="WizardStep1"
            runat="Server" Title="Step 1 - PD">
            <table>
              <tr>
                <td>First Name
              </td>
              <asp:TextBox ID="txt FN"
                runat="Server">
              </asp:TextBox>
            </tr>
            <tr>
              <td>Last Name
            </td>
            <asp:TextBox ID="txt LN"
              runat="Server">
            </asp:TextBox>
          </tr>
        </table>
      </asp:WizardStep>
      <asp:WizardStep ID="WizardStep2"
        runat="Server" Title="Step 2 - Contact">
        <table>
          <tr>
            <td>Mobile no.
          </td>
        </table>
      </asp:WizardStep>
    </div>
  </form>
</body>
</html>
